For teenagers and adults who want to play great songs and spend time with friends, **RTP: Rock the Pulse** is a music therapy group in a rock setting that makes therapy fun.

Band members will learn a variety of songs from the rock genre as well as hear their favorites. As in a traditional rock band setting, the members will get to play a variety of instruments, including the drum set, guitars, and the keyboard. A lead singer and a band manager may also be designated. Some examples of songs include: Crocodile Rock, Rock Around the Clock, We Will Rock You, I'm A Believer, Born to be Wild, Sweet Home Alabama . . .

At **The Carolina Center for Music Therapy**, board-certified music therapists address goals in the areas of social skills, cognitive skills, and communication skills. Through a cooperative effort we strive for progress in these areas while playing great music with friends. Contact us today to get cast and Rock the Pulse!
